

Thermoforming For Any Application Field

Expertise in plastics processing, commitment to customer-oriented service – that's what you get from DUROtherm. Whether we are your supplier or service provider, you will profit from our innovation, know-how and experience.

The One-Stop Shop For Thermoforming:

Thermoformed Components for:

- Automotive components
- Plumbing, heating, air conditioning
- Sports and leisure items
- Medical systems
- Portable sales exhibits
- Promotional displays, advertising
- Machine components
- Building construction, civil engineering, landscaping

Packing Systems:

- Disposable and returnable collapsible container systems
- Custom-designed reusable packing systems
- Standardized reusable packing systems

DUROtherm's Expertise and Capabilities At A Glance:

- Decades of thermoforming experience and know-how
- Single source for design, production and application engineering
- Extensive production capacity on advanced state-of-the-art machines in 3-shift operation
- Application-specific process technologies
- Mould sizes up to 4200 x 2500 mm available
- Highly precise finishing in advanced 5-axis milling stations and laser trimming stations
- State-of-the-art CAD/CAM technology for direct data transfer to finishing process

Know-How From Almost 40 Years of Experience

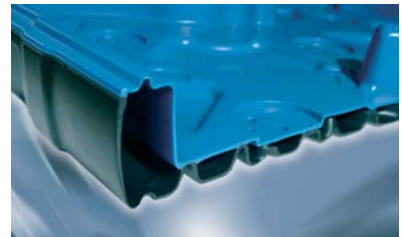

DUROtherm is an expert manufacturer of thermoformed plastic components with almost 40 years of experience in the industry. Whether simple or highly complex in design, whether made in small lots or large production series, all DUROtherm products share two things in common: outstanding quality and highest precision.

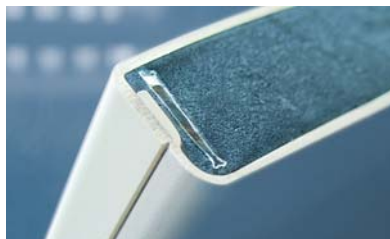

Single-Source Expertise in Thermoforming

Single-Sheet Thermoforming

Twin-Sheet Thermoforming

Thermoformed PU Foam Composites

RRIM Technologies

DUROtherm provides a comprehensive service package covering all areas of thermoforming expertise: project planning, consulting, development, design, prototype fabrication, logistics – all from a single source. Extensive know-how and ongoing investments in state-of-the-art production systems are the driving forces behind DUROtherm's technological leadership.

Extensive Manufacturing Capacity, XXL Mould Sizes

With an extensive range of manufacturing systems in 3-shift operation, DUROtherm can

complete even the largest production series cost-efficiently and on time. DUROtherm has one of the largest production units for contract thermoforming in Europe, capable of making parts up to 4200 x 2500 mm in size.

High-Precision Finishing

Post-process finishing of thermoformed parts is done using 5-axis CNC-controlled milling stations and advanced 5-axis laser systems. DUROtherm utilizes CAD/CAM-programmed finishing, providing time and cost savings – along with outstanding dimensional accuracy.

Series-Produced Components for All Fields and Industrial Applications

Fire protection shield for fuel tank

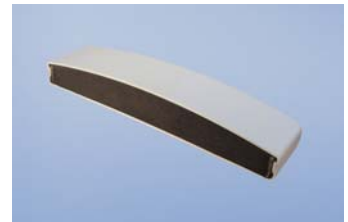

Backing element for shower panel

Side panel for exercise machine

Taillight housing of caravan

PU backfoamed swing-away seat (cross-sectional view)

Twin-sheet thermoformed tank (cross-sectional view)

Interior panel for driver's cabin of construction vehicle

Packing Systems For Secure Transport and Space Savings

Disposable and returnable collapsible container systems

Collapsible container systems from DUROtherm combine all the important features of existing collapsible container systems but go beyond these as well: they are cost-effective, extremely stable and light, and facilitate even more efficient volume reduction.

Custom-Designed Reusable Packing Systems

Product-specific pallet systems, transport containers, contoured inserts and separators from DUROtherm provide outstanding performance in specific user applications with maximum transport safety and attractive economics.

Standardized Reusable Packing Systems

Standardized containers with product-specific inserts and standardized separators significantly reduce logistics costs and allow long-term reuse in the product handling chain.

**Contacting
DUROtherm® Group:**

With its locations in Germany, Switzerland and the Czech Republic, DUROtherm is represented in the central European market as well as the market of the future – eastern Europe. We encourage you to contact us:
