

SOLOPAC pallet collars for all standard pallets

SOLOPAC®

System Design

The new SOLOPAC is a small wonder for collapsible containers. This very affordable plastic pallet collar fits all standard pallets and simultaneously performs two functions. As a container it is perfectly suited to light weight goods, such as empty PET bottles, drink or canned goods cans. Used as shipping protection, it efficiently protects goods loaded directly onto a pallet from damage. Thanks to intelligent corner construction, the self-aligning and non-skid SOLOPAC is easily placed over the pallet.

System advantages:

- ▶ Highly cost-effective procurement
- ▶ Extremely robust and stable
- ▶ Extremely light weight
- ▶ Compatible with all common pallets
- ▶ No modifications needed to existing pallets
- ▶ Custom heights
- ▶ Cost and space savings when transported empty
- ▶ Optimal UV, moisture and rot resistance
- ▶ Easy to use
- ▶ Environmentally friendly and completely recyclable

Designs

SOLOPAC pallet collars are constructed of polypropylene structured-core panels. They are tailor-made for the desired pallet type in customer specified heights. In order to meet every need, SOLOPACs containers are also available in customer specific designs. The sleeve can be ordered in different thicknesses and weights, variable heights, edges that are sealed along the periphery (not along the edges of cut-outs), with gripping holes, label pockets, custom printing, bottom inserts / dividers, partitions or inserts.

Get detailed information about the SOLOPAC system and other DUROtherm collapsible container systems in the brochure "Cost saving collapsible container systems" or in the Internet: www.durotherm.de

Technical data (standard design)

Properties

Property	Description
Material	Polypropylene structured-core panel, approx. 10 mm thick, 3000 g/m ²
Colour	Grey (similar to RAL 7001)
Tare weight	approx. 9 kg
Volume reduction	approx. 90% when stacked empty

Compatible pallets

Pallet system*	Description
Pallet systems and dimensions	Numerous common pallet types and dimensions

* Pallets not included

Dimensions

(based on the Euro pallet 1200 x 800 mm)

Dimensions when assembled				Dimensions when collapsed			
	Length	Width	Height		Length	Width	Height
Outer dimensions (including pallet)	1222 mm	822 mm	800 mm	Outer dimensions	955 mm	800 mm	200 mm
Inner dimensions (cargo space)	1200 mm	800 mm	760 mm				each additional unit: + 50 mm height

Cost saving collapsible container systems

Collapsible container systems from DUROtherm combine all the important features of existing collapsible container systems but go beyond these as well: they are cost-effective with regard to procurement, extremely stable and light, and facilitate even more efficient volume reduction.

Collapsible container systems product line:

There is a collapsible container system ideally suited to every purpose. Of course containers can also be specially designed to meet specific customer requirements.

The product line is always growing. We would be pleased to send you information about new developments.

DUROPAC collapsible containers for Euro pallets or H1 pallets

LARAPAC collapsible containers with integrated single sheet pallet

ROBUPAC collapsible containers with integrated twin sheet pallet

SOLOPAC pallet collars for all standard pallets

Safe shipping, high cost savings

Collapsible container systems by DUROtherm win over customers with their low cost and extreme stability at very low weight. They allow an ideal packing density and reliably protect shipped goods against damage. Because the container sleeve is collapsible, an extremely efficient volume reduction can be achieved when shipping empty or in storage.

Sturdy materials and construction make DUROtherm collapsible containers appropriate for a multitude of uses, help them to withstand high mechanical and thermal loads and make them suitable for rugged industrial use.

These collapsible container systems, designed intelligently to the smallest detail, unify important logistical factors: Reliable protection for the packed goods, combined with enormous space and cost savings.

Innovative container sleeve

The sleeves are ultra light due to air-filled structural chambers, while extremely stable and resilient due to the middle layer that is knobbed on both sides.

Unique system advantages:

- ▶ Cost-effective procurement
- ▶ Reliable protection for shipped goods
- ▶ Extremely light weight
- ▶ High durability and load capacity
- ▶ Cost savings through efficient packing density and volume reduction when stored empty
- ▶ Optimal UV, moisture and rot resistance
- ▶ Meets the toughest hygiene standards
- ▶ Sleeve heights available as required
- ▶ Easy to use
- ▶ Easy cleaning and maintenance
- ▶ Long life and durability, cost savings based on high circulation
- ▶ Environmentally friendly and completely recyclable
- ▶ Customer specific designs

Customer specific designs

Sleeve thicknesses and weights

The plastic sleeve is available in different thicknesses and weights depending on the stability required and load capacity.

Sleeve height

The height of the sleeve can be selected in order to achieve an optimal packing density.

Sealed sleeve edges

For certain uses, e.g. special hygienic requirements, peripheral edge welding is available.

Loading flap

For easy loading and unloading of goods, a loading flap can be built into the sleeve.

Label pockets

Label pockets in various formats are available for marking and labelling containers.

Printing

Any or all of the sides of the plastic sleeve can be custom printed.

Bottom inserts / dividers

For applications that require a completely level bottom surface or the separation of goods, bottom inserts or dividers are available.

Partitioning / moulded inserts

To safely pack goods, product-specific partitioning systems or moulded inserts can be developed.

DUROtherm collapsible containers in use:

SOLOPAC with PET bottles
(Recycling)

DUROPAC for Euro pallets
during loading

LARAPAC folded for return shipping

DUROPAC for H1 pallets
in a customer warehouse

Easy to use

All of the DUROtherm collapsible container systems are designed for simple handling. They can be assembled, folded and stacked very easily without any great effort (DUROPAC container pictured):

Container, assembled

Removing the cover

Folding the sleeve

Placing the sleeve into the base

Replacing the cover

Stacking the folded containers

**Contacting
DUROtherm® group:**

With its locations in Germany, Switzerland and the Czech Republic, DUROtherm is represented in the central European market as well as the market of the future – eastern Europe.

A wide variety of reusable packaging is available, custom designed for every shipping need. Whether a collapsible container, another shipping container from our standard line, or a customer-specific solution is required, we will help you decide on the best solution for your job.
